Glass Fiber Chopped Strands

This document provides a brief description of Glass Fiber Chopped Strands, as represented by LANXESS Glass Fiber CS 7928 4,5MM, its uses, and the potential hazards associated with short and long term exposure. Environmental impact information for accidental releases is included. This information is general in nature and is not intended as a replacement for the safety data sheet (SDS), product label and other safe handling literature. For additional information consult the LANXESS Corporation safety data sheet.

Identification

Chemical Name: Glass Fiber Chopped Strands  
Synonym(s): Fiberglass  
CAS Number: 65997-17-3

Description

Overview: Glass Fiber Chopped Strands are sold under the trade name, LANXESS Glass Fiber CS 7928 4,5MM. Glass Fiber Chopped Strands are odorless solids at ambient temperatures. The product is sold in bags and bins.

Uses: Glass Fiber Chopped Strands are sold by LANXESS for the reinforcement of polyamide grades used in automotive, household and electronic products.

Properties:  
Solubility in Water: Insoluble
Melting Point: 850°C (1562°F)
Potential Human Health Effects

Occupational Exposure

Potential for occupational exposure exists during manufacture, at unloading, storage and staging areas and during sampling, maintenance and processing operations at facilities where Glass Fiber Chopped Strands are used in the manufacture of other products. A much lower potential for exposure exists in facilities using the product in closed manufacturing processes by trained personnel.

Employee Training

Workers handling Glass Fiber Chopped Strands should be trained to implement proper handling procedures and to understand the potential health and physical hazards of this product. LANXESS recommends long pants, a long-sleeved shirt, leather gloves and suitable protective footwear be worn when handling Glass Fiber Chopped Strands. Safety glasses with side shields should be worn if eye contact is possible. Selection and use of a respirator must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Consumer Exposure

LANXESS Corporation does not sell Glass Fiber Chopped Strands to the general public.

Short-Term Health Effects

Inhalation of Glass Fiber Chopped Strands may cause respiratory tract irritation. Symptoms of exposure may include coughing, sore throat and runny nose.

Long-Term Health Effects

No significant effects or critical hazards are expected.

Physical Hazards

Glass Fiber Chopped Strands are stable under normal conditions of use.

Potential Environmental Impact

No significant effects or critical hazards would be expected from an accidental release of this product to the environment.

Conclusion

Under normal conditions of anticipated use as described in this Product Safety Assessment, and if the recommended safe use and handling procedures are followed, Glass Fiber Chopped Strands are not expected to pose a significant risk to human health or the environment.
